

## ANDROID STATIC ANALYSIS REPORT

 NewPipe (0.28.5)

File Name:

org.schabi.newpipe\_1010\_cb84069.apk

Package Name:

org.schabi.newpipe

Scan Date:

May 30, 2026 4:58 p.m.

App Security Score:

47/100 (MEDIUM RISK)

Grade:

Trackers Detection:

1/432

## APPLICATION PERMISSIONS

| PERMISSION                   | STATUS | INFO                        | DESCRIPTION                                                     |
|------------------------------|--------|-----------------------------|-----------------------------------------------------------------|
| android.permission.INTERNET  | normal | full Internet access        | Allows an application to create network sockets.                |
| android.permission.WAKE_LOCK | normal | prevent phone from sleeping | Allows an application to prevent the phone from going to sleep. |

| PERMISSION                                                  | STATUS    | INFO                                                  | DESCRIPTION                                                                                                                                                                                                   |
|-------------------------------------------------------------|-----------|-------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| android.permission.ACCESS_NETWORK_STATE                     | normal    | view network status                                   | Allows an application to view the status of all networks.                                                                                                                                                     |
| android.permission.WRITE_EXTERNAL_STORAGE                   | dangerous | read/modify/delete external storage contents          | Allows an application to write to external storage.                                                                                                                                                           |
| android.permission.SYSTEM_ALERT_WINDOW                      | dangerous | display system-level alerts                           | Allows an application to show system-alert windows. Malicious applications can take over the entire screen of the phone.                                                                                      |
| android.permission.FOREGROUND_SERVICE                       | normal    | enables regular apps to use Service.startForeground.  | Allows a regular application to use Service.startForeground.                                                                                                                                                  |
| android.permission.FOREGROUND_SERVICE_DATA_SYNC             | normal    | permits foreground services for data synchronization. | Allows a regular application to use Service.startForeground with the type "dataSync".                                                                                                                         |
| android.permission.FOREGROUND_SERVICE_MEDIA_PLAYBACK        | normal    | enables foreground services for media playback.       | Allows a regular application to use Service.startForeground with the type "mediaPlayback".                                                                                                                    |
| android.permission.POST_NOTIFICATIONS                       | dangerous | allows an app to post notifications.                  | Allows an app to post notifications                                                                                                                                                                           |
| android.permission.RECEIVE_BOOT_COMPLETED                   | normal    | automatically start at boot                           | Allows an application to start itself as soon as the system has finished booting. This can make it take longer to start the phone and allow the application to slow down the overall phone by always running. |
| org.schabi.newpipe.DYNAMIC_RECEIVER_NOT_EXPORTED_PERMISSION | unknown   | Unknown permission                                    | Unknown permission from android reference                                                                                                                                                                     |
